SUMMARY

Graduate Computer Science student from the University Of Newcastle. Currently seeking an opportunity to kickstart a career of software development. Interests include data science, deep learning and blockchain technologies.

EXPERIENCE, WORK

Love Out Loud Oz, Newcastle — Database Administrator

DECEMBER 2020- April 2021

Updated a complex MS Access database of 10,000 schools and 10,000 churches with new data. Added visual functionality to a Google Maps Platform front end used to interact with the database. Redesigned database with new features and data categories.

iSee, Sydney — Developer (work experience)

AUGUST 2019 - NOVEMBER 2019

Worked on the development of an AI program to simulate a green screen by removing the background from a webcam video for video conferencing software

EDUCATION

University of Newcastle, Australia — B Computer Science

Graduated 2020

I majored in Computer Systems and Robotics before switching to Studies in Computer Science in my final year in order to free up an elective. Some notable subjects included Machine Learning, Deep Neural Networks, Cryptography and Algorithms.

St Francis Xavier's College, Hamilton — HSC

Class of 2014

My HSC subjects included an even distribution between the humanities and STEM subjects. These included my strength areas in Mathematics and Physics as well as subjects such as Extension English II and Studies of Religion to strengthen my communication skills.
